

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1-28. Cancelled.

29. (New) A portable dental treatment system for providing over-the-patient dental services when deployed, comprising:

a dental bracket table, said dental bracket comprising a dental tray and a plurality of dental hand piece holders,

a dental drill disposed in one of said hand piece holders and a dental rinse instrument disposed in a second of said hand piece holders;

a portable base unit, said portable base unit including a power source in communication with said dental drill for allowing a user to operate said dental drill and a water reservoir in communication with said dental rinse instrument for allowing the user to apply rinse water to a dental patient;

at least one suspension device couplable between said dental bracket table and said portable base unit, said at least one suspension device structured to allow a dental patient chair to be positioned substantially below said dental bracket table, whereby said user of the system may provide over-the-patient dental services to said dental patient by accessing, using and returning instruments to said dental hand piece holders.

30. (New) The portable dental treatment system of claim 29, further comprising a foot pedal associated with said portable base unit to allow said user to turn on and off said power source.

31. (New) The portable dental treatment system of claim 30, wherein said power source comprises a pneumatic reservoir.

32. (New) The portable dental treatment system of claim 30, wherein said power source comprises an air compressor or electric motor.

33. (New) The portable dental treatment system of claim 29, wherein said portable base unit further comprises a suction pump in communication with an instrument disposed in one of said dental hand piece holders.
34. (New) The portable dental treatment system of claim 29, wherein said at least one suspension device structured to allow a dental patient chair to be positioned substantially below said dental bracket table comprises a curved member operably couplable between a side of said portable base unit and said dental bracket table.
